

# ARKITEKT

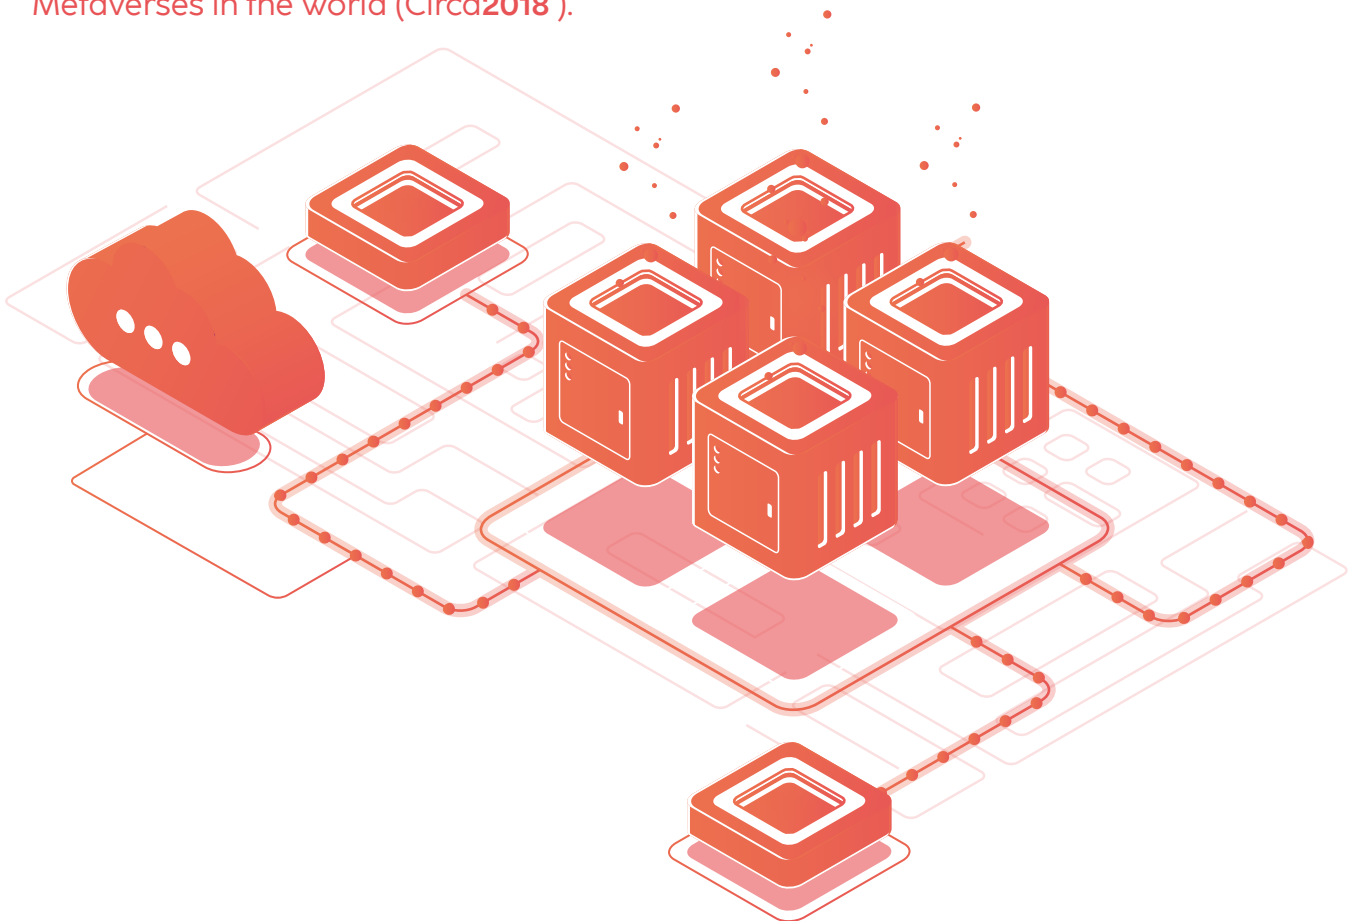

WHITE PAPER

# Introduction

The Arkitekt are a team of Crypto developers, Digital real estate owners and NFT artists looking to build a positive community in Crypto Network. The Arkitekt is a coin that powers a Digital NFT Art House. We own digital real estate property. Interested investors can purchase existing digital properties, an established website, or they can build their own digital properties. We allow you to purchase virtual land and invest in the metaverse.

The use of our coin is to power our NFT Gallery that we will be creating in Aether City Metaverse in the coming year. We allow people to rent out spaces and pay us each month to advertise NFTs in an art gallery. You can pay us to use our unit for actual Ad Space, and also invest in our Unit as part owners. It is a place where both artists and collectors show off their collection to fans and potential secondary market buyers.

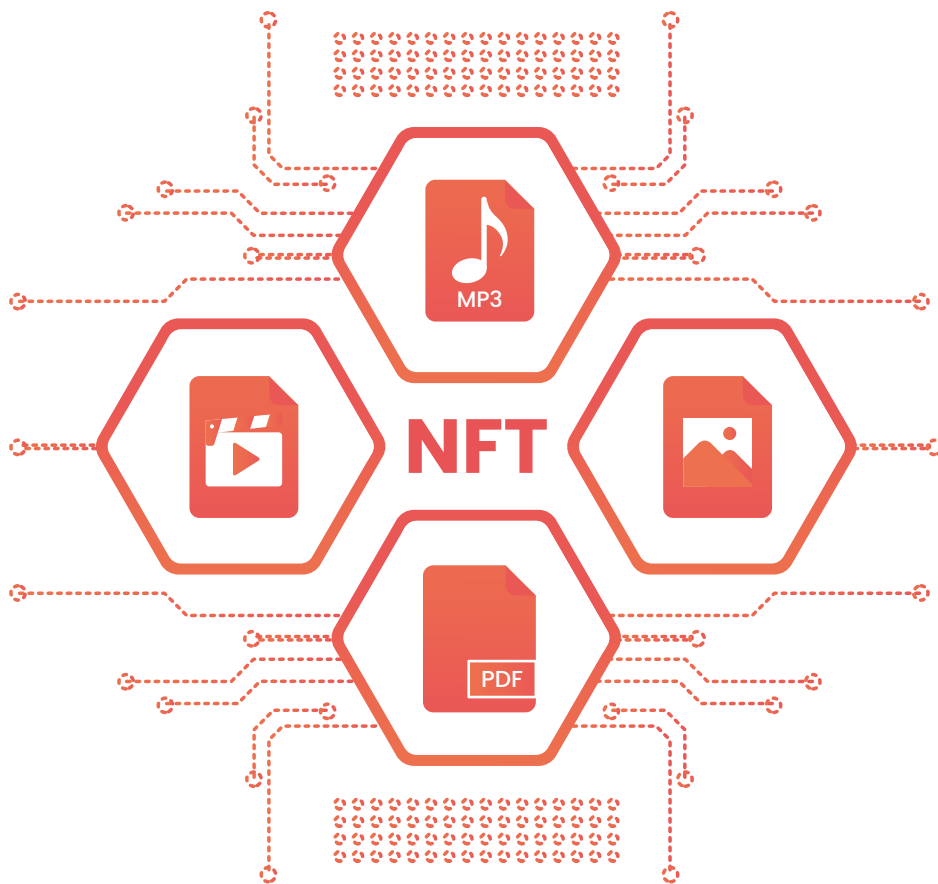

The NFT Real Estate economy is already booming, and we had to find a way to get involved. After some due diligence we discovered Aether City, one of the Founding Metaverses in the world (Circa**2018** ).

# Introduction

We own Digital Real Estate in Aether City, 2 units

- ▶ 1 unit is an Art Gallery where artists can pay to showcase their art + advertisers pay rent to promote their companies during auctions and events
- ▶ The Arkitekt Collection is going to be a cool NFT art project that we are working on for March/April

- ▶ ARKT Coin will be the fuel for all events, rewards, and payment for special pieces dropped by us and our affiliates. The second unit is going to be somewhat of a speak-easy bar where people will eventually be able to go into it for events. We are doing this because The Arkitekt collection is going to be 1K random images of entrances to speakeasies (imagine a vending machine with a door to go inside) and each one will have a random character entering it. That project is not going to be announced until we have a prototype.
